

MC-40 Microcapsules Synopsis

The microcapsules specialized used for carbonless CB paper coating.

Microcapsules have uniform particle size、good color rendering、fast color development、uniform hue、 could customize for blue and black

1. Technical indicators:

I. outward appearance: Micro blue white emulsion

II. Solid content: $\geq 40\%$

III. Viscosity: $\leq 100\text{CPS}$

IV. PH value: 7.0-9.0

2. Instructions:

I. The MC-40 microcapsules have uniform particle size and good color sensitivity. It is an aqueous dispersion that is easy to use.

II. The dosage of MC-40 microcapsules is recommended to be $0.3-0.6\text{g}/\text{m}^2$ solid content.

III. MC-40 microcapsules are suitable for various coating methods such as air knife coating, blade coating, curtain coating, etc.

IV. Store MC-40 microcapsules at $5-35\text{ }^\circ\text{C}$. The quality will change when frozen or above $35\text{ }^\circ\text{C}$.

3. Package:

200kgs/drum

1000kgs/tank
